

Annual Green Home and Garden Tour 2021

Description

We invite you to join us at the Annual Green Home and Garden Tour, taking place virtually on June 4, 2021. This tour will feature homes with energy-efficient technologies, solar panels, and green renovations; watershed-friendly gardens, native plants, rain gardens, rain barrels, and edible landscaping.

This year, the tour will feature short [videos of homes and gardens](#) together with an online meet-the-host event where you can ask the hosts your questions directly in small breakout rooms. We will also have breakout rooms featuring local experts on topics including gardening, stormwater management, and green home renovations. FOUA's [Project HUG](#) is a featured garden.

Join us to get ideas and inspiration for your own home and garden! The suggested donation is \$5 per household.

Registration

This event is sponsored by Arlington County's Office of Sustainability and Environmental Management, EcoAction Arlington, the Virginia Cooperative Extension, and the Friends of Urban Agriculture.
